

## Zigga fly clip system

Founded on modular design principles, the Zigga fly clip system comprises individual metal bands that are interchangeable between our entire range of fly boxes and display cabinets.

Available in either foam or coil design, this new concept allows you, not us, to decide the configuration of your fly box.

No matter where you fish, how large your fly collection, or how frequently you fish, our range of products offers unparalleled versatility, durability and exceptional quality.

Range of flies held on our unique fly clips within a Liberty fly box

INNOVATIVE FLY STORAGE SYSTEMS

## Aluminium Fly Boxes

The result of modern computer aided design, aerospace technology and rigorous testing, this new range of fly boxes is truly state of the art in design, quality and innovation.

Manufactured from thin gauge aluminium alloy, engineered polymers and corrosion resistant steel, our collection of liberty, ultra-light and pocket fly boxes sets a new benchmark in fly merchandise.

Available in two basic sizes, medium [150 x 100] mm and small [100 x 66] mm

All Zigga fly boxes are finished in a tough corrosion

resistant satin silver anodise and employ our exclusive interchangeable fly clip system.

Our medium and small boxes are supplied with either 4 or 2 fly clips as standard, and are backed up by our 5 year product guarantee.

## FLY DISPLAY CABINETS

As the name suggests, these beautifully hand crafted cabinets offer the fly fisherman a superb way of showcasing his or her entire fly collection.

Crafted by skilled tradesman using Australian native timbers, each cabinet is manufactured to stringent quality standards and include:

- ▶ slim line retractable front panel
- ▶ toughened glass window
- ▶ quick-release wall mount
- ▶ tailored labelling system
- ▶ durable closed cell foam lining

Our standard cabinet will accept up to 40 individual fly clips, translating to around 500 individual flies, depending upon size.

Each compartment can be separately labelled, allowing you to personalise your collection and provide an extra finishing touch.

## RIBBON & COIL FLY CLIPS

Made entirely from corrosion resistant stainless steel to exacting standards, our coil fly clips are capable of securely holding fly sizes 6 to 16.

The spring coils hold each fly upright, allowing maximum air circulation for drying and preventing crushed hackle associated with other clip fasteners.

The close pitch of each coil allows precise spacing of different shape or size flies on a single clip, and the coils curved surfaces eliminate virtually all means of hook tip damage.

### Exhibiting

With a durable corrosion resistant steel base and elastic foam upper, our ribbon fly clips are ideal for small dry flies or weighted nymphs. Pre-cut sections hold the shank of each hook securely, allowing flies to be inserted from either side of the ribbon.
